journal of MEMBRANE SCIENCE

Subject Index

Active layer morphology, 245
Adsorption, 9
Anion-exchange membranes, 25, 39
Asymmetric membranes, 245
Asymmetric structure, 161
ATR-FTIR spectroscopy, 245

Bacterial cell surface layers, 147
Biocatalyst, 103
Bioconversion, 103

Cellulose acetate, 245
Ceramic membranes, 89
Charged membranes, 25
Cleaning, 9
Composite membranes, 1
Concentration polarization, 161
Conjugated dienes, 213
Contact angle measurement, 281
Copolymerization graft, 17

Deformation, 123
Dehydration of organics, 281
Diffusion, 259
DNA, 123

Emulsion, 57
Emulsion destabilization, 195

Fatty acid, 9
Filtration, 103
Filtration performance, 67
Fouling, 9, 49, 57, 147
Fractionation, 57
Frictional interactions and coupling effects, 39

Gas permeation, 1
Glucose-sensitivity, 17
Glycine, 207
Granular porous membranes, 67

High temperature membranes, 1
Hollow fiber membrane device, 221
Hydraulic permeability, 17

Insulin delivery, 17
Insulin release, 221
Interpenetrating polymer network, 167
Ion-exchange membrane, 207
Irreversible thermodynamics, 25, 39
Isoelectric point, 207
Isothermal transport, 25

Laminar flow, 269
Latex, 57
Liquid membranes, 131

Macroscopic resistance coefficients, 25
Mathematical model, 221
Membrane formation, 233
Membrane preparation and characterization, 167
Membrane reactors, 213
Membranes, 161
Microfiltration, 57, 269

Neutralization dialysis, 207

Oil-in-water emulsions, 195

Permeation cell, 259
Permeation mechanism, 123
Permeation transients, 259
Pervaporation, 167, 281
pH-sensitivity, 17
Plasma polymerization, 1
Polyacrylamide, 167
Polyelectrolyte complex membranes, 281
Polyether-*block*-polyamide copolymer, 49
Polymer, 57
Polymer anchored palladium complexes, 213
Polymer blend, 233
Polymeric hollow fibers, 213
Polymeric membranes, 167
Polyvinyl alcohol, 167
Pore size, 161
Porous cellular ceramic membranes, 89
Precise permeation measurements, 259
Protein, 123

Rare Earths, 131
Regenerated cellulose hollow fiber (BMM), 123
Rejection, 57

Salt adjunction, 195
Scandium, 131
Screw-thread, 269
Selective hydrogenation, 213
Separation, 131
Simulation, 67
Spinning, 233
Stochastic model, 89
Streaming potential, 281
Structural performance, 67
Structure of an anodic oxide membrane, 89
Surface characterization of membranes, 281
Surface coalescence, 195
Surface modification, 147

Thin film membranes, 1
Transport across charged membranes, 25, 39

Ultrafiltration, 9, 49, 103, 147, 161, 195, 233, 269

Water in poly(dimethylsiloxane), 259
Water structure, 245

X-ray photoelectron spectroscopy, 281
